BETTER PLACE™

LENNOX' ELITE® SERIES

Home Comfort Systems

LENNOX' ELITE® SERIES HEALTHY CLIMATE® HUMIDIFIERS ENHANCE INDOOR AIR QUALITY AND COMFORT.

LENNOX MAKES YOUR HOME...A BETTER PLACE™.

For more than 100 years, people have trusted Lennox to keep them comfortable. With Elite® Series indoor air quality systems, that tradition continues. Among the many innovative solutions are

Healthy Climate® humidifiers, which regulate moisture levels to improve indoor air quality and enhance comfort. No matter which system you choose, you can

count on Lennox to make your home healthier and more comfortable...

A Better Place™.

The perfect antidote to dry indoor air

In the winter, the air inside your home can seem as dry as a desert. In fact, it may actually be drier. The average relative humidity in some homes can be as low as 15%. By comparison, the relative humidity of the Sahara is 25%.

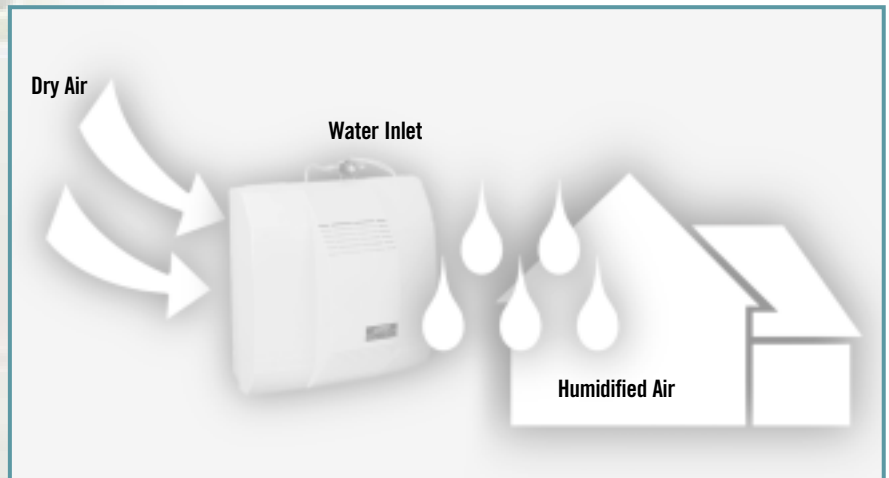

Relative Humidity	
Sahara Desert	25%
Death Valley	23%
Average Heated Home	15%
Studies show that, for optimal health and comfort, your home's relative humidity levels should range between 35% and 50%.	

Dry indoor air has been cited as a major cause of nose, throat and other respiratory ailments. It also leads to skin chafing, chapped lips and annoying static shocks.

Fortunately, you can solve this problem with a Healthy Climate® humidifier. Designed to work with your central heating system, Lennox humidifiers make your home healthier and more comfortable by adding just the right amount of moisture to your home's air.

How a humidifier works

Working with your central heating system and humidistat, the humidifier senses when air needs more moisture and automatically goes to work. Water flows to the top of the humidifier and is distributed evenly across the unit's water panel. Dry air then passes through the moistened panel, where air is humidified and introduced to your home through furnace ducts.

BREATHE EASIER WITH A LENNOX ELITE® SERIES HEALTHY CLIMATE® HUMIDIFIER.

A humidifier for every home

Healthy Climate® humidifiers are available in two basic configurations: Power and Bypass. The Power humidifier is equipped with a built-in fan that circulates humidified air throughout your home via your furnace duct system, while the Bypass humidifier uses a damper to control and direct humidified air. All models are encased with durable plastic to protect against corrosion and provide a long life for your humidifier.

What a humidifier can do

- ◆ **Enhance your comfort** – Humidified air feels warmer, and it helps reduce occurrences of dry skin, chapped lips and static shocks.
- ◆ **Create a healthier home environment** – Proper moisture levels help lower risk of respiratory infections.
- ◆ **Save energy and money** – Because humidified air feels warmer, a humidifier helps lower your heating bills. For example, a 69° temperature at 35% relative humidity feels just as warm as a 72° setting at 19% relative humidity.
- ◆ **Protect and preserve furnishings** – During winter months, a humidifier helps prevent separation of wood in floors, trim and furnishings.

We build to the highest standards. We stand behind our warranties.

The Healthy Climate® humidifiers are backed by a five-year limited warranty on covered components.

Healthy Climate® Humidifier Specifications

Specifications	WATER FEED RATE gph	CAPACITY gph 120° F plenum temp.	SQ. FT. AREA		ELECTRICAL DATA	ALSO INCLUDED	A. UNIT SIZE (HxWxD inches) B. PLENUM OPENING (HxW inches)
